

Shamley Green Moths Alphabetical List

This list shows all the moths recorded at The Bungalow since 2022.

Those with Latin names are micro moths: Butterfly conservation, and everyone else, uses these binomial names for the micros because often the common names vary from country to country (and even county to county) and some don't even have common names.

For photos and information about those with English names see <https://butterfly-conservation.org/moths/a-to-z>

There is also lots of great information on <https://www.ukmoths.org.uk/>
